

## Environmental Policy

Alfa Energy Limited is committed to providing a quality service in a manner that ensures a safe and healthy workplace for our employees and minimises our potential impact on the environment.

We will operate in compliance with all relevant environmental compliance obligations, and we will strive to use pollution prevention and environmental best practices in all we do.

The London office of Alfa Energy Ltd (an Edison Energy company) operates an Environmental Management System in line with ISO 14001 to cover activities over which it has operational control.

We will:

- Continue to purchase electricity and gas from 100% renewable sources with current contract with SSE valid up to September 2024 (electricity) and contract with Crown Gas & Power valid up to March 2024 (gas).
- Integrate the consideration of environmental concerns and impacts into all our decision-making and activities.
- Promote environmental awareness among our employees and encourage them to work in an environmentally responsible manner.
- Train, educate, and inform our employees about environmental issues that may affect their work.
- Reduce waste through re-use and recycling and by purchasing recycled, recyclable, or refurbished products and materials where these alternatives are available, economical, and suitable.
- Promote efficient use of materials and resources throughout our facility, including water, electricity, raw materials, and other resources, particularly those that are non-renewable.
- Purchase and use environmentally responsible products accordingly.
- Communicate our environmental commitment to clients, customers, and the public and encourage them to support it.
- Strive to continually improve our environmental performance and minimise the social impact and damage of activities by periodically reviewing our environmental policy considering our current and planned future activities.

Signed:

Elvin Ahmović  
Commercial Director
