

Net Zero Charter

Net Zero Charter

Alfa Energy Group Limited, the international Energy and Sustainability Consultancy proudly commits to becoming a Net Zero carbon emitter by:

2025

This target, a full 25 years ahead of the U.K. Government's target of Net Zero by 2050, encapsulates the sustainability leadership that Alfa Energy Limited embodies.

Alfa Energy Limited believes that to have integrity, requires honesty and openness, and the importance of integrity when setting a business defining target such as Net Zero is paramount. We will annually publicly disclose the progress we make on our Net Zero journey and the means by which we have made that progress.

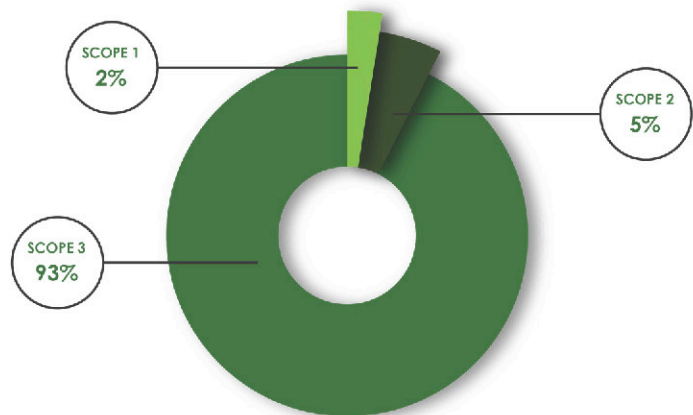

The first step in that public disclosure is to announce the baseline from which we are starting. As a company which has grown every year for the past 25 years, our emissions have grown with us and therefore the baseline we chose to use was for the last full financial year where business as usual conditions existed.

This was the period of January 2020 – December 2020, where we conducted a carbon footprint of our business activities following the GHG Protocol Corporate Standard. A breakdown of our emissions is below.

Scope 1: 14.20 tonnes/CO₂e

Scope 2: 35.05 tonnes/CO₂e

Scope 3: 629.43 tonnes/CO₂e

To ensure that Alfa Energy Limited have the greatest possibility of achieving our ambitious Net Zero target, roles and responsibilities have been assigned that provide clear duties and tasks to those named.

- Gianluigi Corbani, Head of Sustainability and Assets. Co-ordinate and oversee the sustainability team, and ensure targets are met.
- Nikki Wilson, Carbon Compliance Manager. Data validation and GHG Protocol standard compliance checking.
- Matthew Roberts, Sustainability Consultant. Strategy Development and Project Management.
- Albina Abaspahic, Sustainability Analyst. Data Collection and Analysis.

Alfa Energy Limited know that clear commitment to a Net Zero target must come from the top of the organisation and by signing below, pledges to provide all necessary resources to meet this commitment.

Damir Ahmovic, Chief Executive Officer

A handwritten signature in black ink, appearing to read 'D. Ahmovic', is written over a horizontal line.

About Us

Alfa Energy Group is an international energy, water, and sustainability consultancy with 200 employees over 4 international locations. For over 25 years, Alfa has been servicing its clients' needs through energy and water management, sustainability, and compliance consulting, and an intuitive ecosystem of user-driven energy, water, and carbon management software platforms.

With coveted awards, an international industry-wide recognition, and clever simple solutions, today Alfa is partnering with clients to establish and deliver pivotal net zero strategies. Through smart energy management, the expertise and diligence of our people, transparent processes, and data management, Alfa continues to lead through its recognised gold standard of service delivery.
